

• Full set of Signature Nail Systems (SNS) \$50

What is SNS?

The Signature Nail System (SNS) provides a natural and healthy addition to your real nails or extensions.

With:

- No odour - No liquid - No primer - No UV light - Much thinner than other products - Light weight - Easy and fast

The Signature Nail System contains 5 different kinds of Vitamins and Calcium to assist with nail strength and growth.

SNS is the one and only product able to create a natural look of French tip. Powders are Formaldehyde, Toluene and DBP Free.

How is SNS Applied?

The multi-step SNS process overlays directly onto the nail bed to create a long lasting nail with exceptional durability and shine. Because the application doesn't use harsh chemicals, it eliminates the odours that are typically associated with acrylics and gels.

Applications can be customized for each client, with built up thicknesses, a wide variety of colours and glitter available. Application requires minimum filing and sits perfectly against the cuticle. Infill's are just as easy as the application.

The most popular sets are:

- Healthy Nails: A light pink set powder is used on the entire nail to create a natural, healthy appearance.
- Healthy Pink and White: Two powders are used to create a white nail tip with a pink nail bed base, simulating the look of a French manicure.
